REPAIR COUPLING

Effective Nov. 1, 2003

Prices subject to change without notice

Slip-Fix, the original in-line repair coupling is now even easier to use. NIBCO introduces new Slip-Fix® with TruConnect®, the repair coupling which features our revolutionary TruConnect quick-connect technology. Slip-Fix with TruConnect requires no solvent cementing. Just cut the pipe, clean and bevel both pipe ends, extend the coupling and slip over the pipe ends. The TruConnect technology features a stainless steel locking ring and a high performance EPDM sealing ring that assure a leak-proof seal. It is fast, easy and eliminates costly repair time. There's no need to drain the system and dry the pipe. As soon as Slip-Fix with TruConnect is installed, you can back fill the hole and power up the system. No curing time is required. If for some reason you would need to remove the TruConnect coupling, just use our disconnect tool to remove the coupling from the pipe. Slip-Fix with TruConnect connections allow you to rotate the pipe and this can come in handy when repairing risers.

Slip-Fix® with TruConnect®

Installation is Easy

The telescoping design of **Slip-Fix with TruConnect** eliminates the need to dig back long sections of pipe to mend a break. Simply cut out the damaged pipe, extend **Slip-Fix with TruConnect** to fit and push both ends over the pipe.

Easy 3-Step Installation

Step 1: Cut out section of broken pipe 1/4" longer than compressed **Slip-Fix with TruConnect**

Step 2: Clean and bevel both ends of the cut pipe. Push **Slip-Fix with TruConnect** over one of the pipe ends.

Step 3: Extend the other end of **Slip-Fix with TruConnect** and push it over the end of the other cut pipe.
