TORQUE WRENCH

UPC No. 670610	Approx. Weight	List Price
006558	2.0	\$119.60

TORQUE REQUIREMENTS:

The Wide-Body coupling is designed for connection with the same wrench used on "regular" couplings. . . .and the torque requirement is the same, too! (60-in. lbs.) No special tools or high-torque numbers to remember, or forget!

DESIGN ADVANTAGES:

Sealing Sleeve - Sealing rings (in sets of two positioned under each band), ensure a permanent, leak-proof joint with multiple rings on each side of the connection. This accommodates piping o.d. variance with extra assurance of trouble-free service.

Shield - Patented diamond pattern knurled design permanently contains the sealing sleeve to eliminate any movement or extrusion from beneath the shield under internal pressure or external stress. The wider shield and extra bands give significantly increased rigidity to the piping system.
